Board Approved Rate Adjustments for Reliable Service

At their February 25th meetings, PIE&G's board of directors approved an electric and natural gas distribution rate increase to address rising costs, including labor, materials, and interest rates.

While rate increases are never easy, this adjustment helps us maintain reliable service, invest in our workforce and infrastructure, and meet financial obligations. We aim to balance fair pricing with the high service standards you expect.

ENERGY EFFICIENCY tip of the month

Turn Your Suds Into Savings

Lower your energy use in the laundry room by washing clothing with cold water whenever possible, as heating water accounts for most of the energy used in a laundry cycle. Wash full loads to maximize energy savings and use a high-efficiency detergent designed for cold washing. For drying cycles, clean the lint filter before each load to improve the airflow, and use dryer balls to reduce drying time.
